

Special, colourless sealer, excellent penetrating and vapour permeable.

- Reduces absorption of the substrate
- Improves adhesion
- High water vapour permeability
- Fast-drying
- Alkali resistant
- No unpleasant odour

www: Ralston Siloxan Primer

**Application** 

Situation Exterior, interior

**Application** As primer sealer on absorbing, porous, exterior, stony surfaces such as

concrete, masonry and plaster that will be finished with Ralston Siloxan Mat. In case of very strong absorbing substrates, the application can be

repeated wet-in-wet.

**Colors** 

Colours Clear

**Performance and features** 

Acrylate polymer Binder

Density at 20°C Approx. 1 kg/dm3

Solids content Approx. 16 volume %

Drying time (20°C / 65% R.H.) Dust-free after approx. 1 hr, recoatable after approx. 3 hr.

The stated drying times are typical and depend on such factors as

temperature and humidity.

Gloss level Matt, approx. 7 G.U. at 85°

If sufficiently absorbed.

NOTE: The properties and specifications can vary depending on the colour. The values stated are typical.

**Processing** 

v1 7

Dilution Ready to use. If necessary max. 5% water.

Tools/equipment cleaning Water.

Application temperature / R.H. Min. 10 ambient and substrate temp., relative humidity max. 85%.

Theoretical coverage 3 - 7 m2/l

Per layer 3 - 7 m2/l, depending on the porosity and structure of the Practical coverage

substrate. If in doubt, determine on a test area.

Shake well before use. Mixing

Flash point (°C) >110

Safety instructions

The user is subject to the national legislation regarding safety, health and environment. For more information and current data, see the latest version

of the Safety Data Sheet.

EU limit value VOC EU limit value for this product A/a: 30 g/l 2010. This product contains a

maximum of 30 g/l VOCs.

BREEAM We herewith conform that our product can be used in compliance with

– completion phase: C 1.1 through to 1.8; in evidence of compliance, the following must be submitted: 1. VOS Volatile Organic Substance content as determined by product recipe. 2. Products grouped by category in accordance with European Decopaint Directive 2004/42/EC – Enclosure 2:

BREEAM International New Construction. As per HEA 9, requirend evidence

Emission norm for paints, lacquers and clear finishes, phase 2. 3. EU limit value for this product A/a: 30 g/l 2010. This product contains a maximum of 30 g/l VOCs. We apply the above harmonization procedure as

recommended by the Dutch Green Building Council.

Belgian emission label

The product complies with the limit values and other stipulations of the

Royal Decree of 8 May 2014, which defines the threshold levels for emissions to the internal environment from construction products for designated, specific uses, as published in the Belgian Government Gazette

of 8 August 2014.

French emission label A+

Item details

Packaging 5L

Storage Cool and above freezing point; do not allow product quality to deteriorate

during storage.

Shelf life Use within 24 months of the date charge no. stated on the pack figures 1 and 2 = year, figures 3 and 4 = month, 5 and 6 = day of the month.

Assumes unopened product. After opening the packaging, the effect of 'preservatives' in the paint may be reduced. In exceptional cases, this can give bacteria and moulds free rein from outside, which could spoil the

product.

# **System structure**

#### New, exterior, untreated, masonry

- remove loose parts and any cement skin
- repair where necessary
- pre-treat slightly powdery and/or absorbent substrates with Ralston Siloxan Primer
- treat entire surface with Ralston Siloxan Matt [1]
- treat entire surface with Ralston Siloxan Matt [1]

## Existing, exterior, treated, masonry

- remove unsound paint coats
- repair where necessary
- pre-treat patches with Ralston Siloxan Primer
- treat patches or entire surface with Ralston Siloxan Matt [1]
- treat entire surface with Ralston Siloxan Matt [1]

#### General remarks on paint systems and preparation

These remarks on paint application and maintenance are only general. The appropriate paint system to be applied will depend on both the substrate and the requirements to be met by the paintwork.

## Regularly clean and repair any damage to paintwork

Regularly (preferably annually), clean the paintwork and repair any physical or other damage to the substrate or paintwork. This will have a beneficial effect on the condition of the painted object and its paint coating.

#### Adhesion between paint layers

Always sand or de-gloss between paint coating layers. This is essential for good adhesion of each new layer to the previous layer (with the exception of wall paints).

### Regularly check the dew point

When working in lower temperatures, check the dew point frequently. Never apply new paint/coating onto a substrate with condensation (dew). If you do so, the adhesion and film formation will be degraded. Moisture also causes poor drying, and can ruin the gloss.

## Repairs and compatibility with paint

Repairs to substrates, paintwork, connection joints/seams and glazing systems must be carried out with the appropriate products in accordance with the manufacturer's instructions. For wood repair, we prefer wood repair products based on epoxy or polyurethane and for sealing glazing joints to the Soudal Glaskit TS. The Soudal Acryrub CF2 can be used to seal joints and seams in interior wall paintwork. Prior to the commencement of the painting work, assess the mutual tolerance of the products to be applied.

#### **Pretreatment of masonry**

Stony substrates must be solid, load-bearing, sufficiently cured and clean before treatment. Remove any cement/laitance that may be present on cementitious substrates. Cement-bound substrates must be approx. 28 days old before applying a paint or coating. Plaster-bound substrates to be treated may contain max. 2% moisture and other stony substrates max. 4%.

#### **NF DTU 42.1**

The substrates must comply with the relevant DTU standards, particularly NF DTU 42.1. Prior assessment is necessary to determine the most suitable preparation based on their condition and nature (cleaning, washing/rinsing, sanding, scraping, degreasing, dulling, dusting...).
